Visualisation

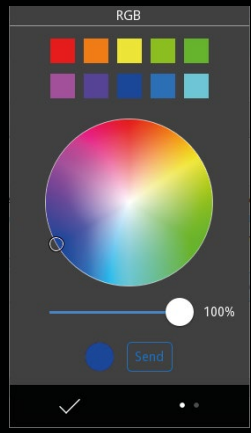
A user interface you will actually want to use

Discover a beautifully crafted user interface where every detail has been carefully designed. Combine a wide range of widgets, including RGBW pickers, regulation bars, rotary controls, and much more. Customize the look & feel to meet your needs and preferences.

- Widescreen 4.3” TFT display (16:9)
- Capacitive multitouch technology
- Up to 96 control functions, organized in 12 configurable pages
- Wide range of UI widgets
- User editable “favorites” page
- Configurable background images in all pages
- Touch gestures (4 swipe gestures + multitouch gesture) to run quick actions even when the display is off (power saving mode)

Dark mode

Try the new “dark mode” — an alternative user interface theme based on a palette of dark tones that reduces the luminance emitted by the screen. Dark mode helps reduce eye strain and facilitates screen use in low-light environments.



Functionality

Not just a pretty face

Iddero **VERSO 2** has everything you need for your next KNX project:

- Weekly time schedules (up to 96 channels, 4 double programs per channel)
- Alarm monitoring (up to 96 alarms) with event log
- Internal scene controller
- Two independent thermostats, featuring P-I control, separate two-stage heating and cooling, etc.
- Four multi-function inputs, individually configurable as binary or temperature probe inputs
- Built-in temperature sensor
- Real-time clock (RTC) with backup battery
- Integrated KNX bus coupling unit (TP1)
- Ultra-low power consumption

Installation options

The device can be installed in portrait or landscape orientation, and supports surface and flush mounting options.

Surface mounting

- In solid walls, using a standard wall mounting box (Iddero ref. E-C466 or equivalent)
- In hollow walls (drywall, plasterboard), using standard wall mounting box suitable for hollow walls (Iddero ref. E-C456 or equivalent)

Flush mounting (*)

- In hollow walls (drywall, plasterboard), using a flush mounting adapter (Iddero ref. E-F401)

(*) Please check the product datasheet. Not recommended for **VERSO** INDOOR.

Remote control from smartphones and tablets

VERSO+IP **2** retains the elegant design, attractive visualisation, and advanced functionality of the Iddero **VERSO 2** touch panel, and adds IP connectivity for anytime, anywhere remote control from smartphones and tablets.

- Mobile apps available for iOS and Android
- Both direct (LAN) connection and cloud-based operation are supported; no additional configuration required
- Support for push notifications
- Communications are fully encrypted and 100% secure

you will fall in love

Iddero VERSO with superpowers
Everything from Iddero **VERSO 2** and **VERSO+**IP **2**, plus door phone integration and IP camera visualisation.

Welcome home!
VERSO INDOOR doubles as an indoor monitor for your door phone system. Receive incoming calls from your door entry panel and enjoy best-in-class performance with exceptional image quality and full-duplex audio with acoustic echo cancellation.

The choice is yours
VERSO INDOOR is compatible with SIP door stations from most major IP manufacturers out of the box, as well as with generic SIP door stations.
