iddero **Home Server 2**

Compact home server for
smartphone or tablet operation

intelligent evolution

iddero **Home Server 2**

Full control of the smart home, without wall-mounted touch panels

Iddero **Home Server 2** is a compact home server for control and monitoring of KNX installations. It combines advanced functionality with a powerful, intuitive visualisation. Control from smartphones and tablets is possible using the **Iddero Mobile** app (iOS / Android). A built-in web-based user interface also allows access from any device running a standard web browser. Both direct (LAN) connection and secure cloud-based operation are supported; no additional configuration required.

Graphical navigation through maps and zones

Up to 512 control pages (more than 4000 functions)

Integrated KNX bus coupling unit (TP1)

Weekly time schedules (with configurable date ranges)

8 multifunction inputs for push buttons, sensors, etc.

User-editable scenes

4 independent thermostats with separate 2-stage heating and cooling

Logic and arithmetic functions

Event notifications via push, e-mail, or GSM (**)

Alarm monitoring with event log

Presence simulation with day and night schedules
