4.3” KNX capacitive touch panel

Visualisation

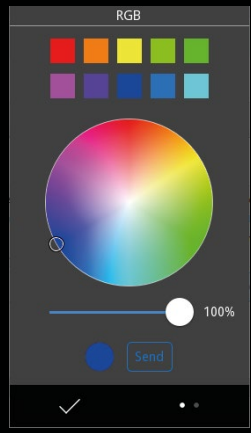
A user interface you will actually want to use

Discover a beautifully crafted user interface where every detail has been carefully designed. Combine a wide range of widgets, including RGBW pickers, regulation bars, rotary controls, and much more. Customize the look & feel to meet your needs and preferences.

- Widescreen 4.3” TFT display (16:9)
- Capacitive multitouch technology
- Up to 48 control functions, organized in 6 configurable pages
- Wide range of UI widgets
- User editable “favorites” page
- Configurable background images in all pages
- Touch gestures (4 swipe gestures + multitouch gesture) to run quick actions even when the display is off (power saving mode)

Dark mode

Try the new “dark mode” — an alternative user interface theme based on a palette of dark tones that reduces the luminance emitted by the screen. Dark mode helps reduce eye strain and facilitates screen use in low-light environments.



Functionality

Not just a pretty face
Iddero **VERSO** has everything you need for your next KNX project:

- Weekly time schedules (up to 48 channels, 4 double programs / channel)
- Alarm monitoring (up to 48 alarms) with event log
- Internal scene controller
- Two independent thermostats, featuring P-I control, separate two-stage heating and cooling, etc.
- Four multi-function inputs, individually configurable as binary or temperature probe inputs
- Built-in temperature sensor
- Real-time clock (RTC) with backup battery
- Integrated KNX bus coupling unit (TP1)
- Ultra-low power consumption

Installation options

Iddero **VERSO** can be installed in portrait or landscape orientation, and supports surface and flush mounting options.

Surface mounting

- In solid walls, using a standard wall mounting box (Iddero ref. E-C466 or equivalent)
- In hollow walls (drywall, plasterboard), using standard wall mounting box suitable for hollow walls (Iddero ref. E-C456 or equivalent)

Flush mounting (*)

- In hollow walls (drywall, plasterboard), using a flush mounting adapter (Iddero ref. E-F401)

(*) Please check the product datasheet. Not compatible with **VERSO**/INDOOR.

Remote control from smartphones and tablets

VERSO+IP retains the elegant design, attractive visualisation, and advanced functionality of the Iddero **VERSO** touch panel, and adds IP connectivity for anytime, anywhere remote control from smartphones and tablets.

- Mobile apps available for iOS and Android
- Both direct (LAN) connection and cloud-based operation are supported; no additional configuration required
- Support for push notifications
- Communications are fully encrypted and 100% secure

VERSO / INDOOR

4.3” KNX capacitive touch panel
with IP connection and door phone function

it’s going to be awesome

Iddero VERSO with superpowers
Everything from Iddero **VERSO** and **VERSO+**IP, now with twice as many UI controls (up to 96 controls organized in 12 pages), plus door phone integration and IP camera visualisation.

Welcome home!
VERSO / INDOOR doubles as an indoor monitor for your door phone system. Receive incoming calls from your door entry panel and enjoy best-in-class performance with exceptional image quality and full-duplex audio with acoustic echo cancellation.

The choice is yours
VERSO / INDOOR is compatible with SIP door stations from most major IP manufacturers out of the box, as well as with generic SIP door stations.
