

Iddero Voice Control

Iddero Voice Control lets you interact with your Iddero touch panel or Iddero Home Server through Alexa. Switch the lights on and off, adjust RGB light color and brightness, open or close window blinds, or set the room temperature using only your voice.

Your home is at your command!

Requirements

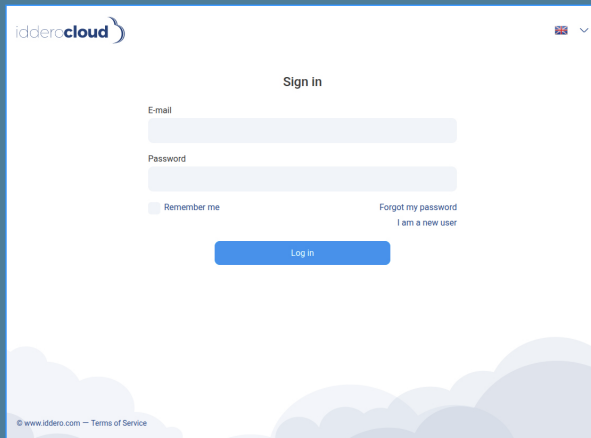

1. A compatible Iddero product (see table below)
2. An idderocloud user account (you can create one at www.idderocloud.com)
3. The Iddero product must be linked to your idderocloud account
4. The Iddero Voice Control service must be activated for the Iddero product you intend to control using your voice

Note: If you have not activated Iddero Voice Control yet for your Iddero product, please contact your system integrator or get in touch with Iddero tech support (support@iddero.com)

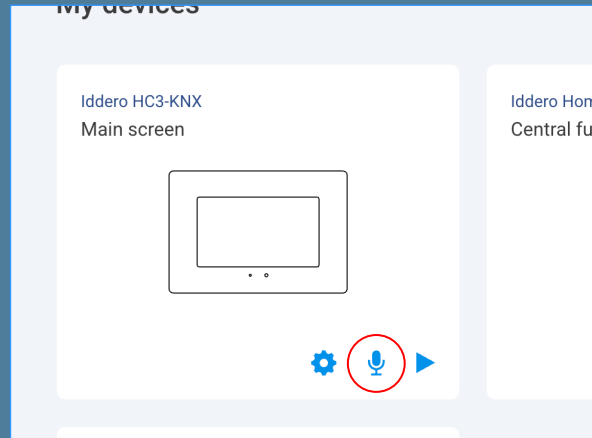

Compatible Iddero Products

Iddero VERSO+IP touch panel	Firmware version 1.5 or later
Iddero VERSO+IP 2 touch panel	Firmware version 3.0 or later
Iddero VERSO INDOOR touch panel	
Iddero HC3-KNX 7" touch panel	Firmware version 5.0 or later
Iddero HC3L-KNX 10.1" touch panel	
Iddero Home Server 3	

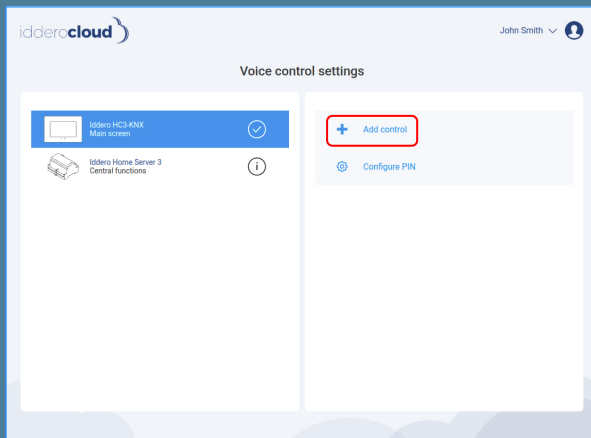

Configure your devices (in idderocloud)

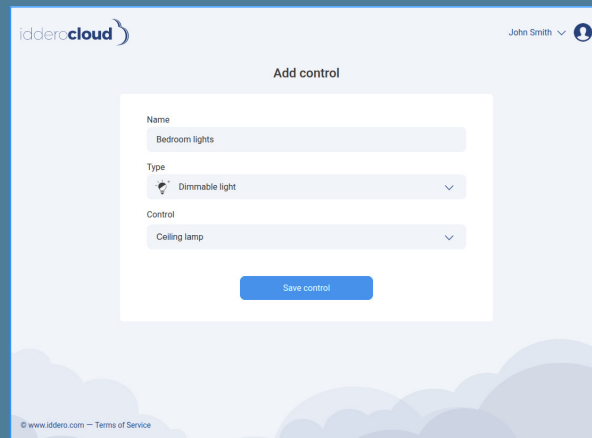

- 1 Log in to idderocloud.com using your idderocloud account credentials

- 2 Click the microphone icon next to the Iddero device you want to configure

- 3 Click "Add control" to enable new "controls" for the selected Iddero device

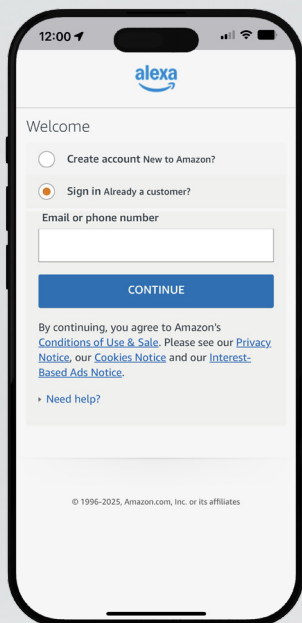

- 4 For each control:
 - Select a control type (e.g., light, blind...)
 - A list of compatible controls will be appear; select one item from the list
 - Enter a friendly name to use with voice control (you can change this later in the Alexa app)

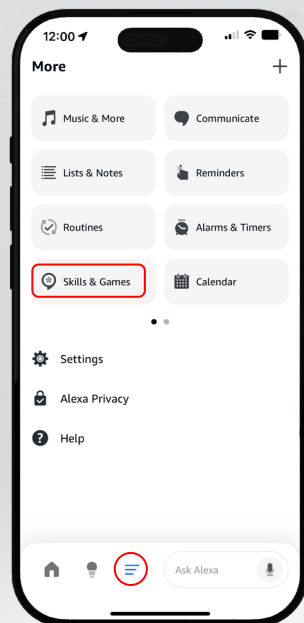

Note: If you have not activated Iddero Voice Control yet for your Iddero product, please contact your system integrator or get in touch with Iddero tech support (support@iddero.com)

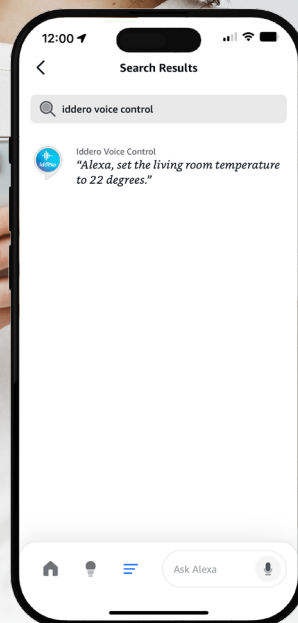

Setup Alexa

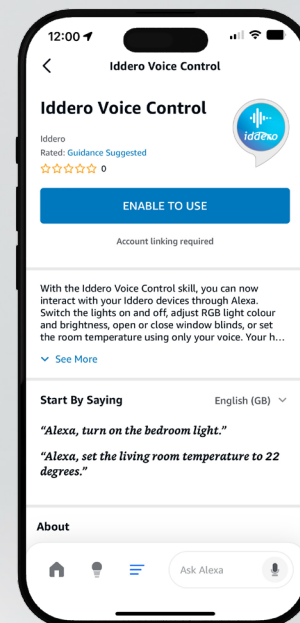

- 1 Install the Amazon Alexa app on your smartphone and log in using your Amazon account

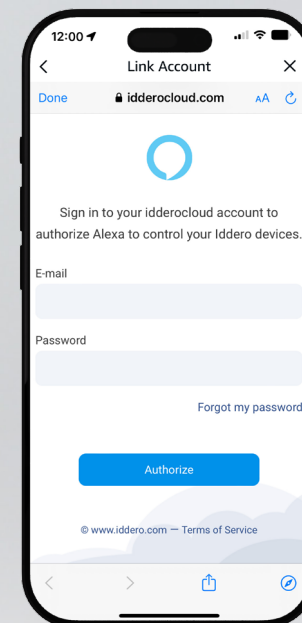

- 2 Tap the "More" icon (≡), then tap "Skills & Games"

- 3 Search for the Iddero Voice Control skill (*)

- 4 Tap "Enable to use" to activate the skill

- 5 Enter your idderocloud credentials to link your account and authorize Alexa to control your devices (**)

(*) Availability of the Iddero Voice Control skill may be restricted in some countries. If the skill doesn't appear in search, please contact Iddero tech support.

(**) If you configure additional controls in idderocloud after these steps, you will need to tell Alexa to "discover new devices".
